SOMNATH CHAKRABORTY

ANDROID DEVELOPER

PROFILE SUMMARY

An ardent Android enthusiast, my experience in the field lies in Java, Kotlin, Jetpack libraries, and so much more!
With my love for programming hoisted by a burning desire to learn new things, I've been proactively seeking and exploring new technologies.

I've been tinkering with the Android platform since 2020. Apart from this, I also maintain a keen interest in Web Development and ReactNative.

EDUCATION

Master of Computer Applications (MCA)
Chandigarh University (2020-2022)

Bachelor of Computer Applications (BCA)
Techno India University (2017-2020)

10 + 2 Computer Science
Narbheram Hansraj English School (2009-2017)

PROJECTS

MyMovies
- An app that fetches popular movies from the TMDb website. Users can also search and save the movies of their liking.

- The app is made using Kotlin, Retrofit, Room, Coroutines, Navigation Component, and the MVVM architecture.

MyNotes
- A simple note-taking application created on the principles of CRUD.

- The components used are Kotlin, Room, Navigation Component, and the MVVM architecture.

GetNews
- An app that fetches trending news from the NewsApi website. Users can also search news, demo ads, and notifications can also be sent via FireBase.

- The app is made using Kotlin, Retrofit, Room, Coroutines, Navigation Component, FireBase, and **the MVVM architecture.**

TRAINING/COURSES

- **The Complete Android Oreo Developer Course – Udemy, Inc.**

- **Core Java Trainings – Internshala Trainings.**
